

LEGAL DEFENSE EVIDENCE

Counsel triage, evidence priorities, and 24-vector crosswalk

INTERNAL COUNSEL-REVIEW DRAFT
NOT LEGAL ADVICE

Purpose. Convert a complex source narrative into discrete, testable evidence packets while keeping occurrence, attribution, motive, coordination, and damages separate.

ALLOW

Document each discrete occurrence and obtain the primary record.

QUALIFY

Separate occurrence, attribution, motive, coordination, and damages.

HOLD

Timing, repeated language, or multiple accounts do not prove common control.

STOP

Do not promote physical-harm or single-coalition theories without direct corroboration.

Evidence boundary

Source narrative is capped at E2 unless independently corroborated. Archive integrity may reach E4 locally. Privilege and work-product are not asserted by this AI-generated draft and must be determined by counsel.

8 highest-value evidence packets

24 vectors mapped

4 decision states

1 defensive evidence sequence

Evidence packets and defensive sequence

Primary records first; causal promotion only after corroboration and alternative-explanation testing.

P1 - highest documentary value

- 1 Sponsor / co-option**
Original contract, drafts, messages, metadata, and counterparty identity.
- 2 Platform / identity / bank**
Enforcement notices, appeal logs, authentication logs, and bank or legal notices.
- 3 Romania**
Search or warrant file, seizure inventory, charging documents, detention and court orders.
- 4 UK / extradition / FCDO**
Warrant and orders plus authenticated source material.
- 5 Provider infrastructure**
Stripe, Discord, domain, hosting, and termination notices with policy or legal basis.
- 6 NGO / litigation funding**
Funding and payment records, donor-recipient chain, counsel and disclosure records.
- 7 Settlement / silence**
Offer, counsel correspondence, and exact confidentiality terms.
- 8 Chronology / control graph**
Authoritative timestamps plus ownership, funding, instruction, and common-decision links.

Defensive evidence sequence

- 1** Freeze originals.
- 2** Record SHA-256, metadata, custodian, and source.
- 3** Preserve native exports and adverse or disconfirming material.
- 4** Build an independent timestamp chronology.
- 5** Split occurrence from motive.
- 6** Map actor independence and common control.
- 7** Test alternative explanations.

Defensive filters

- Preserve counterevidence and apply symmetric criteria.
- Build a privacy-minimised ownership, funding, and instruction graph.
- Preserve raw originals, context, communications, and provenance.
- Keep alternatives open: many sources, a coherent story, correlation, or testimony do not establish causation.

24-vector evidence map

AV-01 to AV-06. P1 = highest documentary value | P2 = context or corroboration | C = counterevidence | R = resilience | HOLD = no causal promotion.

ID	Vector	Mechanism	Sector	Ev	Pri	Primary proof / next receipt	State
AV-01	Co-option / conditional sponsorship	Speech or opinion conditions attached to money	Brands / sponsors	EV-02	P1	Contract, drafts, messages, metadata, counterparty identity	E2 -> E4
AV-02	Reputation priming / narrative synchronization	Repeated negative framing before later actions	NGOs / media	EV-03	P2	Posts plus provenance	Signal only
AV-03	Endogenous controversy amplification	Affiliates optimize clipped content for engagement or sales	Affiliates / platform algorithms	EV-04	C	Affiliate analytics and raw clips	Confounder
AV-04	Deplatforming / distribution denial	Account or platform bans	Social platforms	EV-05	P1	Platform notices and appeal logs	E4 target
AV-05	Identity / session denial	Broad logout or account-access failure	Identity / app ecosystem	EV-05	P2	Authentication and device logs	Cause open
AV-06	Financial exclusion / account restraint	Bank or financial access restricted	Banks	EV-05	P1	Bank and legal notices	E4 target

24-vector evidence map

AV-07 to AV-12. P1 = highest documentary value | P2 = context or corroboration | C = counterevidence | R = resilience | HOLD = no causal promotion.

ID	Vector	Mechanism	Sector	Ev	Pri	Primary proof / next receipt	State
AV-07	Payment-rail denial	Processor termination	Payment processor	EV-09	P1	Processor termination notice	E4 target
AV-08	Domain / DNS / hosting denial	Domain loss or registry action	Registry / hosting	EV-09	P1	Registrar and hosting record	E4 target
AV-09	Search / raid / arrest	Coercive law-enforcement action	Police / prosecution	EV-07	P1	Warrant, raid file, and inventory	Event / motive split
AV-10	Asset seizure	Cash, property, or vehicle restraint	Police / prosecution / courts	EV-07	P1	Seizure inventory or order	E4 target
AV-11	Surveillance / warranting	Requests alleged to begin at synchronized time	Investigative authority	EV-08	P1	Timestamped warrants	Correlation only
AV-12	Charge expansion / organized-crime framing	Multiple criminal allegations	Prosecution	EV-07	P1	Charging documents	E4 target

24-vector evidence map

AV-13 to AV-18. P1 = highest documentary value | P2 = context or corroboration | C = counterevidence | R = resilience | HOLD = no causal promotion.

ID	Vector	Mechanism	Sector	Ev	Pri	Primary proof / next receipt	State
AV-13	Pre-trial detention / movement restriction	Jail, house arrest, or movement constraint	Court / corrections	EV-07, EV-12	P1	Detention and court orders	E4 target
AV-14	Public perp-walk / media amplification	Enforcement action becomes reputational event	Police / media	EV-07	P2	Raw video and media chronology	Coordination open
AV-15	Legal chilling	Risk warnings discourage public challenge	Legal / state interface	EV-10	P2	Counsel notes, source, and context	Testimony only
AV-16	Adversarial interview framing	Interview or editing used as narrative pressure	Media	EV-11	P1	Booking terms plus raw and edited media	E4 target
AV-17	Extradition / cross-border legal pressure	Foreign legal process constrains movement	State / judiciary	EV-12	P1	Warrant and extradition orders	Procedure not motive
AV-18	Education counter-programming / policy response	Schools or politicians respond to influencer content	Education / politics	EV-13	P1	Parliament, school, and government records	Response not coordination

24-vector evidence map

AV-19 to AV-24. P1 = highest documentary value | P2 = context or corroboration | C = counterevidence | R = resilience | HOLD = no causal promotion.

ID	Vector	Mechanism	Sector	Ev	Pri	Primary proof / next receipt	State
AV-19	Travel / hospitality friction	Alleged official contact with hotel	Foreign office / hospitality	EV-14	P2	Hotel and government contact record	Unverified
AV-20	Litigation-resource asymmetry	Third-party-funded legal defense or large legal team	NGO / legal services	EV-15	P1	Funding, payment, and disclosure file	Funding not state
AV-21	Settlement / NDA / silence incentive	Money offered for case resolution and silence	Litigation	EV-16	P1	Settlement offer and exact terms	Terms unverified
AV-22	Physical-harm escalation hypothesis	Speaker infers possible killing after other measures fail	Unknown actors	EV-18	HOLD	Specific attributed threat evidence	Speculation
AV-23	Resilience / counterdistribution	Self-hosting, processor, bank, software rebuild, affiliates	Business / technical	EV-04, EV-09	R	Provider rebuild and continuity receipts	Response path
AV-24	Common-control / coordinated-coalition hypothesis	Different institutions allegedly act as one system	Cross-sector	EV-03, EV-06, EV-08, EV-12, EV-15	P1 / HOLD	Ownership, funding, and instruction graph	Common control unproven

SOURCE / CONTROL RECEIPT: Derived from the 24-vector crosswalk and source dossier. No external web verification in this pass. Human counsel review is required before filing, disclosure, publication, or evidentiary characterization. No model or dossier closes the case.
